Assessment

‘ Assessment is the process of gathering, recording, interpreting, using, and reporting, information about a child’s progress and achievement in developing knowledge, skills and attitudes. ’

Assessment in the primary school curriculum – Guidelines for Schools

Record Sheets

In this booklet, there is a Whole-class Assessment Record sheet and a copy of the Individual Pupil Record sheet that is also in each copy of *Master Your Maths*.

Whole-class Assessment Record

The Whole-class Assessment Record sheet enables the teacher to gather and record evidence/results of the children’s progress and achievement. This useful information can be interpreted and used to inform the teacher of how each pupil is doing in relation to his/her peers as well as how the class is progressing as a whole. This method of continuous assessment is a curriculum profile of the class and can help and inform the teacher with her/his planning.

Individual Pupil Record

‘ Assessment is about building a picture over time of a child’s progress and/or achievement in learning across the Primary School Curriculum. ’

Assessment in the primary school curriculum – Guidelines for Schools

The Individual Pupil Record sheet has a space at the top for the teacher to write the child’s name. This is a method of continuous assessment to record the child’s progress over the academic year.

Self-assessment

‘ Children are involved in self-assessment when they look at their own work in a reflective way, identify aspects of it that are good and that could be improved, and then set learning targets for themselves. ’

Assessment in the primary school curriculum – Guidelines for Schools

The Friday test pages in the children’s textbook (*Master Your Maths 1 – 6*) can be used as sample portfolio assessments. These weekly tests provide samples of children’s work as evidence of learning. Using the Friday tests, the children could also work in pairs/groups to discuss how they feel about their learning. Children can be encouraged to think and talk about their learning using the following prompt questions:

- Where did I get stuck?
- What helped me best?
- What did I do to solve this problem?
- What new thing did I learn?

The tests enable the child to recognise the next steps in his/her learning and give the child the skills and motivation to become more independent learners. This promotes positive involvement of the children in their learning while also informing the teacher’s planning.

Reports

Information from assessment records can be used to compile a child’s report, which can inform discussion between teacher and parents about the child’s learning strengths and weaknesses.
